

BRAINSTORMING & IDEATION PHASE

MODULE 1 : Brainstorming & Ideation

Date :	27.09.2026
Team ID :	SWTID-2026-4107
Project Name :	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Step 1: Team Gathering, Collaboration and Select the Problem Statement

Problem Statement

The IT procurement process for standard laptop requests involves several manual activities, including processing approved requests, creating tasks, and assigning them to the appropriate team. These manual activities can lead to delays and inconsistencies in the request-handling process.

How Might We?

How might we streamline the Standard Laptop procurement process and reduce manual effort in task creation and assignment?

Initial Discussion

During the initial discussion, the team identified the following areas:

- Manual processing of laptop requests
- Delay in creating tasks after approval
- Need for proper task assignment
- Difficulty in maintaining consistency
- Need for better coordination between procurement and hardware teams
- Need to reduce repetitive manual work

The team discussed different possible approaches for improving the process and decided to explore **ServiceNow-based automation**.

Step 2: Brainstorm, Idea Listing, Grouping

Detailed Ideas

The team brainstormed the following possible ideas:

- Automate the Standard Laptop request process
- Automatically create tasks for approved requests and assign tasks to the appropriate team

- Automatically Use ServiceNow Flow Designer for process automation
- Improve visibility of laptop procurement tasks
- Reduce manual intervention in the procurement process
- Improve consistency in handling laptop requests & verify the process through a test request

Step 3 – Idea Prioritization

Brainstormed Ideas & Prioritization

Category / Idea	Importance	Feasibility	Priority
Automate Standard Laptop request processing	High	High	1
Automatically create tasks for approved requests	High	High	2
Automatically assign tasks to the Hardware team	High	High	3
Use ServiceNow Flow Designer	High	High	4
Improve task visibility	Medium	High	5
Reduce manual intervention	High	High	6
Improve process consistency	Medium	High	7
Verify the process using a test request	Medium	High	8

Selected Idea

Based on the brainstorming and prioritization, the team selected:

“Automate the Standard Laptop procurement process using ServiceNow Flow Designer.”

This idea focuses on reducing manual effort and improving the consistency of processing Standard Laptop requests.
